

Workshop in Methods

Writing Better R Code

Hui Zhang

Research Analytics

This workshop provides intermediate users with an overview of intermediate and advanced techniques for programming using R. The workshop will emphasize well known approaches for improving the performance of R codes. Some previous knowledge of R is recommended since the course will not go into specific details of R syntax. Some familiarity with C/C++ is also recommended.

Topics will include:

- Improving Loops' Performance in R
- Using Plys
- Vectorization
- Rcpp
